56	33. Rights of minorities (culture, religious practice and language)		7HZCOVIS
57	DISCLAIMER		

Methodology for Sustainability Due Diligence

Scope of this report

We appreciate that all companies, no matter where they operate or what they do, are at risk of sustainability impacts, and we intend to assess our business units at operational level or – where applicable – at representative level. This report is for Micropower Sweden AB.

To make this report, we have assessed adverse impacts that Micropower Sweden AB has or may have on each of the 48 human rights. We focus our assessments on the more likely impacts, not all imaginable impacts.

Where an actual impact occurs or has occurred, it is treated as an actual impact, and where an impact remains a risk only, such risk of an adverse impact is treated as potential. We focus assessments on where Micropower Sweden AB may 'cause' or 'contribute to' adverse impacts. When Micropower Sweden AB is merely 'linked to' adverse impacts; the assessments identify known severe impacts in the value chains only.

In case of multiple impacts on the same human right, each adverse actual or potential impact is treated separately.

Where we identify risks, we describe who is at risk or where the risks occur; what we do, or will do, to prevent or mitigate the risk; the indicators by which we measure effectiveness; who oversees managing the risk; and any additional resources that need to be allocated where added actions are deemed necessary or commendable.

Where we find 'no risks' of adverse impacts, we describe why we reached such conclusion.

This report consists of 55 impact assessments against all 48 human rights and constitutes a 100% complete human rights impact assessment for Micropower Sweden AB.

Micropower Sweden AB has identified a total of 27 impacts on 20 human rights whereof 3 are considered severe. Of the identified impacts, we have 27 potential and no actual impacts.

We found that we have no risk of impacts on 28 of the 48 human rights.

Compliance Report

Results of our impact assessment

What we have identified

The 27 impacts were identified on the following 20 human rights:

- 2. Right to non-discrimination (6)
- 3. Right to work (training, contract, termination) (3)
- 4.a. Right to equal pay for equal work (1)
- 4.b. Right to a living wage (minimum wage) (1)
- 4.c. Right to safe and healthy working conditions (1)
- 4.d. Right to equal opportunities for everyone to be promoted (1)
- 4.e. Right to rest, leisure, and paid holidays (1)
- 5. Right to form and join trade unions and the right to strike (1)
- 6. Right to social security, including social insurance (1)
- 7.a. Right to protection of mothers before and after childbirth (1)
- 7.b. Right to children's and young people's protection from exploitation (no child labour) (1)
- 8.b. Right to adequate clothing (1)
- 9. Right to health (1)
- 11.c. Right to material gains from inventions (1)
- 11.d. moral rights of authors (protection of copyrights) (1)
- 13.a. Right not to be subjected to torture, cruel, inhuman and/or degrading treatment or punishment (1)
- 15. Right to liberty and security of person (1)
- 23. Right to privacy (1)
- 25.b. Right to freedom of expression (1)
- 25.c. Right to freedom of information (1)

Each impact assessment is listed below in order of the human rights. The 3 severe impacts are marked with ●.

Compliance Report

▲ 1. Right to self-determination (indigenous peoples rights)

IMP NO #SWNUQ4W2

Impact identification:

Impact type	No impact
Description	<p>Micropower Sweden AB assesses that we are not at risk of causing or contributing to adverse impacts on the right to self-determination (indigenous peoples rights). We do not directly work in areas belonging to, owned by or shared with indigenous people. We do not use indigenous peoples inventions, symbols, culture or land. We acknowledge the Sami population in our countries of operation (Sweden and Finland). Our Swedish operations are located in Växjö, Gothenburg, and Stockholm, which are areas without large representation of indigenous peoples. We acknowledge that raw material extraction activities occur in countries or areas where indigenous peoples live and exercise their cultural rights, and that these areas may be represented in our value chain, which we expect our business relationships to manage. Confer HuRi 15. Right to liberty and security of person for risk identification and mitigation of potential adverse impacts concerning conflict minerals.</p>

▲ 2. Right to non-discrimination

IMP NO #ZCIWOQBJ

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	('RACE', COLOUR, NATIONALITY, ETHNICITY) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination based on race, colour, nationality, or ethnicity. Potential impacts may occur in: - Hiring and promotion of employees (including screening of candidates) - Treatment of employees - Selecting and treating business partners - Advertisements and other internal and/or external communications (representation, etc.)
Identified stakeholder(s)	- Employees - Business relationships - Candidates in hiring procedures - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Quarterly employee satisfaction survey for selected employees - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION) Micropower Sweden AB: - Addresses the risk of biases linked to 'race', colour, nationality, and ethnicity in recruitment processes. - Where applicable, discusses this right with recruitment agencies. Micropower Sweden AB will: - Consider formalising representation in marketing materials. - Clarify this area in our employer branding materials. (Instructions to recruitment partners)
Indicators of effectiveness	1. Number of reports/grievances based on the right to non-discrimination ('race'/colour/nationality/ethnicity) 2. Results of the employee satisfaction survey As for the suggested actions: 3. Consideration of formalising representation in marketing materials: Decision 4. Area clarified in employer branding materials.
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job openings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Supplier Manual and contracts - Sustainability report - Company websites - Town hall meetings - Marketing materials

Compliance Report

Compliance Report

2. Right to non-discrimination

IMP NO #TB6C8RJY

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(DISABILITY/FUNCTIONAL VARIATIONS AND HEALTH CHALLENGES) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination based on disability/functional variations and health challenges. This could especially occur through lack of attention to creating equal opportunities for including people with disabilities/functional variations or due to possible biases. In particular, impacts may include: - Possible biases towards people with disabilities/functional variations. - Unequal opportunities regarding employment and promotion. - Communication material may not take accessibility challenges into consideration. - Limited accessibility to facilities, including safe exit in case of emergency. - Social exclusion or harassment in the work environment. - Lack of infrastructure for employees with visual and auditory disabilities to allow them to work successfully and navigate resources. See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION)
Identified stakeholder(s)	- Employees - Business partners - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Sales and marketing procedures - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION). Micropower Sweden AB: - Is committed to providing equal opportunities regardless of characteristics such as disability. (MP Code of Conduct for Managers and Employees) - Ensures that buildings meet contemporary accessibility requirements under national law. - Has offices in a building that was built during an era where accessibility was integrated in the architecture. - Has facilities in buildings that were built during an era where accessibility was integrated in the architecture. - Adjust tasks to people stating functional variations. - Where possible and needed, allows for hybrid working and other flexible arrangements (e.g. part-time, remote work, etc.) to accommodate for disabilities, functional variations and health challenges on the part of employees. - Assesses the psychosocial work environment continuously through employee interviews and training of managers and leaders. (MP Sustainability Report 2023) - Assesses how operating processes and working tools can be adapted to physical differences among employees and make reasonable adjustments, e.g. colour blindness. - Communicates health requirements in job ads, where needed. Micropower Sweden AB will: - Consider reviewing communications through text and visual representations to facilitate accessibility for people with disabilities/functional variations.
Indicators of effectiveness	1. Number of reports/grievances related to this area 3. Results of the employee satisfaction survey As for the suggested actions: 4. Decision made concerning review of communication materials and guidelines
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Sustainability Report - Company websites - Marketing materials

Compliance Report

2. Right to non-discrimination

IMP NO #CVP1GHO8

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(RELIGION, SOCIAL STATUS, POLITICAL OPINION) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination based on religion, social status, or political opinion. Adverse impacts may result from: - Biases in the context of hiring procedures and promotions. - Not accommodating specific religious needs at the workplace (such as prayers, dietary constraints, or clothing), where possible. - People with specific religious beliefs, social backgrounds or political opinion experiencing social exclusion or bullying at the workplace. - Failing to consider religious holidays and practices in our offices/facilities, and holiday planning. See also: - HuRi 2. Right to non-discrimination (GENDER AND SEXUAL ORIENTATION) - HuRi 13.a. Right not to be subjected to torture, cruel, inhuman and/or degrading treatment or punishment (harassment)
Identified stakeholder(s)	- Employees - Business partners - Candidates in hiring procedures - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews - Supplier Manual and Supplier Portal
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION) Micropower Sweden AB: - Allows flexible holiday planning to accommodate for religious practices and holidays. - Accommodates for different dietary preferences at the workplace and company-related events, when applicable. - Ensures that spaces are available for employees to pray or meditate in an adequate environment (vilorum).
Indicators of effectiveness	1. Number of reports/grievances based on the right to non-discrimination (religion/social status/political opinion) 2. Results of the employee satisfaction survey
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Sustainability Report - Company websites - Town hall meetings - Marketing materials

Compliance Report

2. Right to non-discrimination

IMP NO #L5L9EAJ8

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(LANGUAGE) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination based on language. Potential impacts may concern: - Employees, business partners, customers, and others who speak English (or another language), but not the local language at a place of operation, such as Swedish, may experience exclusion. - The company's Whistleblower system may not allow for complaints in native languages. - Employment documents and materials for customers, employees or candidates in hiring procedures may not be available in English. - Different languages may be used, in particular in-between meetings and in informal gatherings. - Language qualifications may present a barrier to recruitment and task execution in certain positions. See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION)
Identified stakeholder(s)	- Employees - Business partners - Candidates in hiring procedures - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews - Supplier Manual and Supplier Portal and Supplier Portal
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Commits to providing equal opportunities regardless of listed and 'other' characteristics. While there is no explicit reference to language, it qualifies as an other characteristic. (MP Code of Conduct for Managers and Employees) - Ensures that (local) language requirements are clearly mentioned in job advertisements when necessary. - Ensures that all group policies, materials and internal systems are available in English. - Ensures that external instruction manuals, SOPs and safety procedures are available in relevant languages. - Ensures to have a translator or translations available, where necessary. - Seeks to ensure that English is spoken at the office and sites whenever employees or visitors may not be fluent in the native language to the location. - Has a Whistleblower system (and other mechanisms) that allows submissions in relevant languages. Micropower Sweden AB will: - Consider whether all local policies, materials and internal systems should be available in English. - Consider formalising English as a corporate language.
Indicators of effectiveness	1. Number of reports/grievances related to the right to non-discrimination (language) (employees) 2. Results from the employee satisfaction survey As for the suggested actions: 4. Consideration whether all local policies, materials and internal systems should be available in English: Decision 5. Consideration of formalising English as a corporate language: Decision
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Supplier Manual and Supplier Portal and contracts - Sustainability Report - Company websites - Marketing materials

Compliance Report

Additional information:

Additional notes	<i>**No Notes registered**</i>
Assigned responsible person	Annika Undin HR Manager
Assigned resources	Considerations: 3 Day(s) - Consider whether all local policies, materials and internal systems should be available in English. - Consider formalising English as a corporate language.

Compliance Report

▲ 2. Right to non-discrimination

IMP NO #5CKTS1MH

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(AGE) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination based on age, for example, in recruitment processes, during promotion considerations and when providing benefits to employees.
Identified stakeholder(s)	- Employees - Business partners - Candidates in hiring procedures

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews - Supplier Manual and Supplier Portal
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination (GENDER AND SEXUAL ORIENTATION). Micropower Sweden AB: - Does not consider age as a determining factor in decision-making in recruitment processes. - Ensures not to pose requirements or create opportunities for employees with specific age references. - Ensure age is not referenced in job listings. - Explains in relevant (privacy) policies whether information on the age of employees is collected and stored, where it is stored, who has access, and why it is necessary. - Only collects and assesses age data in background checks and information forms where there is a legitimate purpose. - Where applicable, communicates to applicants and employees that the provision of information on age for legitimate purposes, such as positive action programmes, is optional.
Indicators of effectiveness	1. Number of reports/grievances concerning the right to non-discrimination (AGE) (2. Level of diversity among managers and employees management / employees (AGE)) 3. Results of employee satisfaction surveys
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Supplier Manual and contracts - Sustainability Report - Company websites - Town hall meetings - Marketing materials

Description	<p>(GENDER AND SEXUAL ORIENTATION) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to non-discrimination, including discrimination based on gender and sexual orientation. Impacts may occur in: - Recruitment and promotion processes. - Remuneration, by not paying equal salaries for equal work (Gender Pay Gap, see also the right to equal pay for equal work), - Lack of representation of certain groups, in particular leadership positions, - Treatment of employees, - Treatment of business relationships, - Representation in marketing materials, related to stereotyped perceptions of customers, - Harassment, including sexual harassment in the workplace (see also right not to be subjected to torture, cruel, inhuman and/or degrading treatment or punishment) - Company support for parenting and caregiving favouring one gender. Micropower Sweden AB always encourages a positive work environment, where everyone is appreciated, respected and valued for their differences and stimulates a culture of inclusion. See also: - HuRi 4.a. Right to equal pay for equal work - HuRi 4.d. Right to equal opportunities for everyone to be promoted - HuRi 13a: Right not to be subjected to torture, cruel, inhuman or degrading treatment</p>
Identified stakeholder(s)	- Employees - Business relationships - Candidates in hiring procedures - General public

Compliance Report

Impact management:

<p>Actions to engage with affected stakeholder(s)</p>	<p>- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews - Supplier Manual and Supplier Portal</p>
<p>Actions to cease, prevent and/or mitigate the adverse impact</p>	<p>Micropower Sweden AB: - Is committed to providing equal opportunities regardless of characteristics, including all discrimination grounds. (MP Code of Conduct for Managers and Employees) - Recognises fair representation as an expectation in hiring procedures. - Has an equality perspective in recruitments, where recruitment advertisements must have a gender-neutral message and the selection process has a focus on equality. (MP Sustainability Report 2023) - Acknowledges challenges in recruiting women to leading positions in management groups and boards. (MP - Sustainability Report 2023) - Has a set goal of a 40% of women both in the management team and in the company as a whole. (MP - Sustainability Report 2023) - Publicly shares data on the number of men and women employed, as well as the ratio of women in the total workforce (MP Sustainability Report 2023) - Assesses the psychosocial work environment continuously through employee interviews and training of managers and leaders. (MP Sustainability Report 2023) - Works with recruitment firms to achieve gender representation goals - Supports positive actions to promote equal representation. - Is a member of the UN WEP (Women Empowerment Principles) - Ensures a gender-neutral language in all communications, where possible, and a gender-balanced representation in visual communications. - Ensures that at least two people review applicants' profiles during recruitment processes to counter individual biases. Micropower Sweden AB will: - Consider updating CoCE - Consider providing regular implicit biases trainings, covering all discrimination grounds - Consider including non-discrimination in marketing policy - Consider recognising in policy documents that more gender identities exist, though the company's registration in accordance with regulation, is limited to a binary gender perception. - Establish grievance mechanisms for employees and other stakeholders in relation to all potential impacts. - Consider wording and targeting in job advertisements to attract diverse applicants and develop a formalised manner of informing on the company's aspiration for a diverse workforce and its encouragement for all applicants to apply regardless of status with regard to all discrimination grounds.</p>
<p>Indicators of effectiveness</p>	<p>1. Number of reports/grievances related to this area 2. Percentage of women in employment / managing positions 3. Results of employee satisfaction survey With regards the actions suggested: 4. Updating CoCE: Decision 5. Implicit biases training considered: Decision 6. Non-discrimination in marketing policy considered: Decision 7. Consideration of policy documents adjusted to recognise additional genders: Decision 8. Grievance mechanism established 9. Consideration of wording in job advertisements: Decision</p>
<p>Results of tracking effectiveness based on the indicators</p>	<p>**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //</p>
<p>Actions to communicate our actions to the relevant stakeholders</p>	<p>- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Supplier Manual and Supplier Portal and contracts - Sustainability Report - Company websites - Town hall meetings - Marketing materials</p>

▲ 3. Right to work (training, contract, termination)

IMP NO #LXKX5NR8

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(TERMINATION) Micropower Sweden AB assesses that we may be at risk of causing adverse impacts on the right to work (termination) by not securing that notices of termination are issued within due time and with adequate rationale.
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Does not arbitrarily or unfairly dismiss employees, in line with national labour laws. - Gives fair notices of termination for all employees, as a minimum 1 month within first 2 years of employment, unless the employee exhibits gross neglect of service. The notice period differs in relation to the length of employment. - Follows practice in alignment with union agreements and processes when terminating an employment. - Gives fair warnings when possible, depending on severity, of non-compliance with employment terms. - Provides sufficient reason to the affected employees when terminating employment contracts. Micropower Sweden AB will: - Consider clearly communicating the conditions of termination when relevant, for example during hiring and onboarding processes, as well as in engagements with managers. - Implement trainings for production leaders concerning this topic.
Indicators of effectiveness	1. Number of reports/grievances concerning this area Concerning planned actions: 2. Consideration of clearly communicating the conditions of termination when relevant, for example during hiring and onboarding processes, as well as in engagements with managers: Decision 3. Implementation trainings for production leaders concerning this topic: Status
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook

Compliance Report

Compliance Report

▲ 3. Right to work (training, contract, termination)

IMP NO #R06GK4HP

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(TRAINING) Micropower Sweden AB assesses that we may cause adverse impacts on the right to work by not providing sufficient vocational training for employees to fulfil their tasks: - When they start working in the company - Throughout their employment in the company - When they transition from one position to another We also acknowledge that employees may have insufficient time for competence development and training.
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Supports employees in development of skills and competencies. - Has on-boarding programmes for new employees. - Has an internal training portal for employees. (MP - Sustainability Report 2023) - Has contacts with with selected universities in Sweden in various electronics areas. (MP - Sustainability Report 2023) - Has a leadership training programme in place as of 2022, aiming to develop our production leaders and creating conditions for a good work environment - Informs employees when they are entitled to trainings and encourages taking the time to complete trainings within work hours, including introductory trainings when starting a new role and that people in roles requiring specific certifications, receive training to obtain them. - Measures and publicly reports the average hours of training per year per employee. (MP - Sustainability Report 2023) - Offers development opportunities that enable our people to turn their ambition into sustainable development for the individual, the team, and the business. - Requires managers to review progress and coach employees by requesting and giving feedback. - Ensures that all employees have individual performance plans with clear goals and development activities. - Dedicates a sufficient share of the annual budget to training and development. - Has a "buddy" system for new employees at production facilities - Has clear internal responsibility allocation for learning and development activities. Micropower Sweden AB will: - Consider clarifying and formalising training requirements for people transitioning to different positions within the company. - Consider developing a training programme for managers and leaders outside production.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Average hours of training per year per employee 3. Results of employee satisfaction surveys 4. Percentage of staff holding needed vocational certificates where necessary As for the suggested actions: 5. Consideration of clarifying and formalising training requirements for people transitioning to different positions within the company: Decision 6. Consideration of developing a training programme for managers and leaders outside production: Decision
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Sustainability Report - Town hall meetings

▲ 3. Right to work (training, contract, termination)

IMP NO #AH32URTR

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	(CONTRACT) Micropower Sweden AB assesses that we may have an adverse impact on the right to work, specifically to receive, in writing, adequate job descriptions and conditions of work. Impacts may occur by: - Failing to provide a written contract/employment letter before job start - Not having clear job descriptions in employment contracts or by not updating them when changes in the job occur - Requiring employees to carry out work that was not stated in their contract - Not stating the expected number of working hours - Not providing sufficient opportunities for employees and management to discuss the terms of their contract
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Ensures that all employees have a signed contract by the beginning of their employment. - Ensures that employees receive the contract in advance with enough time before the start of employment to review and engage in dialogue on the conditions of work. - Ensures that all employees receive written job descriptions, which clearly outline tasks and responsibilities. Job descriptions related to the specific roles are available on the corporate intranet and by request, in addition to being shared upon employment. - Ensures that employment contracts include average working hours, vacation, etc. - Requires signed contracts for salaries to be paid out as enabled by our salary system. - Updates contracts, when necessary.
Indicators of effectiveness	1. Number of reports/grievances concerning this area 2. Results of the employee satisfaction survey 3. Percentage of employees with a written contract 4. Percentage of employees with clearly defined and up-to-date job descriptions
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

4.a. Right to equal pay for equal work

IMP NO #YA7X84U9

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may cause adverse impacts on the right to equal pay for equal work in relation to any of the discrimination grounds. (See also HuRi 2: Right to non-discrimination and HuRi 4.d. Right to equal opportunities for everyone to be promoted). Micropower Sweden AB recognises that adverse impacts may occur: - when defining starting salaries in recruitment processes, - in the evaluation of employees' performance to determine bonuses or other benefits, Micropower Sweden AB acknowledges that Sweden is known for a relatively high representation of women in the workforce. However, Sweden is still criticised for lack of equal pay for equal work with regard to women. Further, we acknowledge that there may be differences in salaries related to the location of employment (regional within Sweden). Confer HuRi 4.b. Right to a living wage (minimum wage).
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1)
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination Micropower Sweden AB: - Has an equality perspective in our recruitments, where recruitment advertisements must have a gender-neutral message and the selection process has a focus on equality. (MP - Sustainability Report 2023) - Annually reviews our wage policy ensuring the use of objective and gender-neutral criteria to determine salaries. - Annually conducts a salary mapping to identify potential inequalities in pay based on discriminatory denominators, including measuring and reporting on relevant metrics, including the ratio of basic salary and remuneration of women to men (see also GRI 405-2, ESRS S1-16, and Article 9(1) Pay Transparency Directive) - Ensures that job titles are gender-neutral. (Article 5(3) Pay Transparency Directive) - Ensures that personal data obtained to ensure equal pay for equal work shall not be used for any purpose other than for the application of the principle of equal pay (See also HuRi 23: Right to privacy). (Article 12(2) Pay Transparency Directive) - Ensures that people having exercised or supported another person in obtaining their right to equal pay shall not face reprisals. (Article 25 Pay Transparency Directive)
Indicators of effectiveness	1. Number of reports/grievances in relation to unequal pay for equal work. 2. Results of employee satisfaction survey 3. Ratio of basic salary and remuneration of women to men 4. Annual salary mapping and wage policy completed
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

Compliance Report

▲ 4.b. Right to a living wage (minimum wage)

IMP NO #30ZO17N4

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we are at risk of causing adverse impacts on the right to a living wage, especially concerning employment of unskilled labour. In Sweden, there is no universal minimum wage. Instead, pay and other minimum employment terms are commonly determined by collective bargaining agreements.
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews - Supplier Manual and Supplier Portal
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Pays wages that are market competitive and consistent with industry standards in the countries in which we operate. (MP - Code of Conduct for Managers and Employees) - Regularly reviews the wages of all low-skilled employees to ensure that they meet applicable collective agreements or comparable standards that guarantee a living wage at the site of operation. - Has an ongoing dialogue relevant unions to ensure adequate wage for employees in production. - Trusts that the unions we engage with calculates and considers living wages in relation to policies and negotiations. - Applies wage agreements agreed upon with unions to all relevant employees. See also HuRi 4.a. Right to equal pay for equal work.
Indicators of effectiveness	1. Number of reports /grievances concerning wages and cost of living. 2. Results of the employee satisfaction survey.
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Supplier Manual and Supplier Portal and contracts - Sustainability Report

Approved on	24-01-2025 by Louise Karlsson

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impacts on the right to safe and healthy working conditions in terms of physical health, covering non-ergonomic working positions and work-related accidents, as well as exposure to dangerous elements and tasks concerned with the manufacturing of our products. We may also have risks of adverse impacts in relation to mental health (stress) and the psychosocial work environment. We further recognise that people visiting our factories may be at risk of adverse impacts, as the sites may entail exposure to dangerous elements such as machines, vehicles and chemicals.
Identified stakeholder(s)	- Employees

Compliance Report

Impact management:

<p>Actions to engage with affected stakeholder(s)</p>	<p>- Hiring and recruitment procedures - Monthly employee satisfaction survey - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews</p>
<p>Actions to cease, prevent and/or mitigate the adverse impact</p>	<p>Micropower Sweden AB: General, including all sites: - Integrates both physical and psychological health and safety into every aspect of our daily business. - Supports proactive and visible health and safety leadership. - Has a working environment policy covering health and safety areas - Requires employees to stop work and immediately report any issue to their manager if you believe a task may cause an injury or illness to you or your colleagues. - Monitors actions and improvements via our work environment system. - Integrates preventive psychosocial work as part of the company's overall health initiatives (illness and rehabilitation). - Conducts regular employee talks in which the topics of the working environment and the work pressure are raised. - Places office desks in reasonable distance to windows to ensure natural light. - Provides guidance for employees on how to use work stations in an ergonomically good way. - Has height adjustable desks for all employees enabling employees to stand or sit. - Has a partnership with a business partner who is focused on supporting us and our employees in the upholding of safe and healthy working conditions for the office environment as well as production, with a focus on preventative care and rehabilitation. - Has a work environment group dedicated to health and safety issues, and monitors accidents, incidents, risk observations (near-miss system), performed safety rounds and illness (short- and long term). - Meets all reasonable requests for special ergonomic needs when providing equipment for work. - Offers physiotherapy and psychological counselling if needed for rehabilitation purposes. - Continuously optimises shift planning, primarily in relation to production, to ensure that enough employees are available to meet deadlines, thus preventing causing adverse impacts on this right. - Sponsors 50% of memberships of sports clubs, gym memberships etc. with a max contribution of 2000 SEK per year and FTE. - Has an employee group that regularly arranges physical activities to promote health, for which we set aside an annual budget per FTE. Production/Manufacturing sites: - Focuses, and conducts regular training for relevant staff on electrical safety, truck driving and fire safety. (MP - Sustainability Report) - Is ISO 45001 certified (health and safety management system). (Deloitte - ESG Due Diligence Report) - Provides clear and updated instructions to employees in relation to their tasks. In particular concerning tasks that include dangerous components such as heavy lifting, exposure to hazardous substances, operating of machinery and vehicles etc. - Provides safety equipment and user instructions to all employees in manufacturing and visitors, as appropriate for their tasks/exposure. - Conducts extensive, cross-functional risk assessments when there are changes to the production processes, including in the introduction of any new equipment. Micropower Sweden AB will: - Consider communicating signs of stress-related conditions to all employees, creating a culture where team members are aware of signs of stress and collaborate as best possible to cover for colleagues in need. See also HuRi 9. Right to health</p>
<p>Indicators of effectiveness</p>	<p>1. Number of reports/grievances in relation to this area 2. Results of ISO 45001 inspections 3. Number of workplace incidents 4. Number of workplace accidents 5. Number of reports to near-miss system 6. Number of performed safety rounds 7. Measured illness (long- and short term) 8. Consideration of communicating stress-related symptoms: Decision</p>
<p>Results of tracking effectiveness based on the indicators</p>	<p>**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //</p>

▲ 4.d. Right to equal opportunities for everyone to be promoted

IMP NO #556R2OH0

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impacts on the right to equal opportunities for everyone to be promoted. We acknowledge that, despite the fact that women in Sweden are well represented on the labour market, representation of women in management in the private sector has been low. This may be due to lack of equal opportunities to be promoted for women compared to men. This may also be the case for other minority groups. See also HuRi 2: Right to non-discrimination, HuRi 4.a. Right to equal pay for equal work and HuRi 7.a. Right to protection of mothers before and after childbirth.
Identified stakeholder(s)	- Women and other minority groups amongst employees

Impact management:

Actions to engage with affected stakeholder(s)	- Employee development talks - Grievance mechanism - Hiring procedures - Employee representative - Employee survey - Contract of employment - Hiring procedures - Individual talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Has gender-neutral messaging in all job advertisements, including promotions - Prioritises fair representation with regard to promotions and employment. - Has a goal to increase the proportion of women in leading positions at all levels: 40% women on the board, management team and in the company as a whole. - Seeks to ensure that candidates for open positions represent a balanced gender distribution. - Ensures, if possible, that candidates for open positions represent various minority groups. - Ensures that more than two people are involved in promotion and employment processes. Micropower Sweden AB will: - Adopt a strategic focus on improving equal gender representation on all leadership levels and mid-level management. See also actions under HuRi 2. Right to non-discrimination.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Percentage of women in management 3. Percentage of female employees 4. Percentage of women on the board 5. Strategy developed and adopted
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Sustainability Report - In Job listings - Employment contracts - Access to impact assessments inviting for ideas or grievances - Code of Conduct for Employees (CoCE) - Intranet - Employee handbook

▲ 4.e. Right to rest, leisure, and paid holidays

IMP NO #LBDFWMBJ

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have an adverse impact on the right to rest, leisure, and paid holidays by: - Allowing or encouraging overtime - Not ensuring that employees have the opportunity to take vacation - Not ensuring an adequate permanent or temporary replacement in key positions when necessary (See also HuRi 4c: Right to safe and healthy working conditions)
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 4c: Right to safe and healthy working conditions - stress. Micropower Sweden AB: - Expects full-time employees to work 40 hours per week, including breaks. - Encourages employees to take time off in lieu, or compensate for overtime in alignment with reports to internal system. - Informs employees in due time if additional work hours or overtime is needed. - Reminds and encourages employees to take vacation within the vacation year. - Engages in dialogue with employees on how to distribute vacation, and describe how to apply for holidays/days off. - Provides employees with a minimum of 25 days paid vacation each year, 3 consecutive weeks of which are usually allocated to the summer period. - Allows new employees to take vacation in advance of 'earning' the vacation days for the year. - Has a time registration system, enabling us to keep track of employee work hours in alignment with the EU Working Time Directive. - Records overtime with a maximum of 100 hours depending on the role in an internal system (tidsbank) and adjusts discrepancies in alignment with union agreements. - Applies relevant regulation (semesterlagen) for temporary workers. - Allows employees to take one-day leaves (permission) in case of extraordinary circumstances, such as funerals, in alignment with union agreements. Micropower Sweden will: - Consider formalising explaining to relevant employees that they are not expected to read or act upon emails or other means of communication outside work hours, unless there is a crisis.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Average of registered overtime 3. Consideration of formalising expectations: Decision
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook

▲ 5. Right to form and join trade unions and the right to strike

IMP NO #ID4I45RL

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have a risk of adverse impacts on the right to form and join trade unions and the right to strike. We may experience that workers feel forced to join, or refrain from joining, specific unions.
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Respects employees right to freedom of association and collective bargaining and does not discriminate employees based on union membership status. - Does not allow harassment based on union membership. - Ensures workers have the right to appoint worker representatives and form workers' associations or join trade unions of their own choosing.(MP - Code of Conduct) - Cooperates with union representatives. (MP - Sustainability Report) - Informs employees of union membership clubs - Does not advice employees on union memberships or non-memberships. - Does not interfere with employees' right to strike in alignment with collective agreements.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Employees covered by an employee representative or by a collective bargaining agreement
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

▲ 6. Right to social security, including social insurance

IMP NO #NE0EVIH5

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impacts on the right to social security, including social insurance. We appreciate that the Swedish welfare state provides for universal healthcare for citizens, secures some pensions for elderly citizens, insures people in case that they cease to be able to work before age of retirement, and provides for basic insurances to employees through: - Parental leaves. - Universal and free medical care. - Sickness benefits beyond one month's absence. - Additional support in case of chronic diseases or disabilities. - Pensions by retirement from the age of 67. Adverse impact may occur, e.g., when state coverage is insufficient or in relation to the mandatory pension schemes that apply to all employees.
Identified stakeholder(s)	- Employees

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Ensures that all employees, including temporary employees, are covered by adequate workers compensation in case of accidents, as well as travel insurance. - Has established a pension scheme (tjänstepension), where Micropower Sweden AB contributes with certain percentage of the gross salary. We follow established practices and apply an ITP pension scheme setup that amounts to a percentage of at least 4,5% (ITP1), or per agreement and based on pension level guarantees (ITP2). - Clearly informs employees, on at least an annual basis, where they may find information about their pension schemes. - Acknowledges that pension schemes allow employees to transfer their saved pension (tjänstepension) to their inheritance in case of death, however, this is set up by the pension fund. - Has union agreements covering all employees, relevant to each role.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

7.a. Right to protection of mothers before and after childbirth

IMP NO #87BH6J5M

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have adverse impacts on the right to protection of parents before and after childbirth: - By failing to adjust work tasks to pregnancy, e.g., heavy lifting whilst pregnant. - By failing to acknowledge inclusion of employees on parental leave when evaluating employees' possibilities for promotion, bonus, etc. We recognise that parental leave is a legal right for all parents in Sweden, as well as the right to take care of sick children. (See also HuRi 4c: Right to safe and healthy working conditions and HuRi 4d: Right to equal opportunities for everyone to be promoted).
Identified stakeholder(s)	- Employees - Expecting parents

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring, promotion and recruitment procedures - Monthly employee satisfaction survey - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Ensures that all employees are entitled to leave in relation to pregnancy, adoption, and parenthood. We follow Swedish regulations, stipulating that new parents are entitled to 480 days leave with pay (föräldrapenning), to be shared between them. We acknowledge that each parent is to take at least 90 days of leave, and refer to försäkringskassan for additional information. - Covers this area in our union agreement, and clearly communicates to employees about how it applies. - Adapts work tasks to suit the individual pregnant employee's situation when made aware. - Follows a procedure as agreed upon with unions when assessing adaptations required to a pregnant person's tasks, with emphasis on employees in the production facilities due to the nature of tasks. - Are open to increase job-flexibility for expecting employees and new parents, and seeks to accommodate when possible. - Has guidelines on parental leave in our staff handbook, where procedures are outlined. - Refers employees to the responsible authorities (försäkringskassan) for more information on procedures, and supports them in their process when needed. - Ensures good leave and return conditions for new parents, which also includes a conversation with the employee's direct manager on the topic. - Ensures that parental leave will not influence an employee's seniority or performance review and offer both salary conversations and promotions during the employee's leave. - Informs managers that they should have salary conversations with employees on leave. Micropower Sweden AB will: - Include additional information on parental leave in employee handbook, clarifying our efforts to ensure job flexibility, adaptation in job tasks, information about return conditions and salary/promotion process inclusion for concerned parties. - Formalise that parental leave will not influence an employee's seniority or performance review and offer both salary conversations and promotions during the employee's leave. See also: - HuRi 4c: safe and healthy working conditions and HuRi 4e: right to rest leisure and paid holidays). - HuRi 4d: Right to equal opportunities for everyone to be promoted.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Employee handbook updated 3. Parental leave in relation to to seniority, performance, promotions and salary conversations formalised.
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook

7.b. Right to children's and young people's protection from exploitation (no child labour)

IMP NO #PJ7002LZ

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	<p>Micropower Sweden AB assesses that we may be at risk of adverse impacts on the right to children's and young people's protection from exploitation and child labour. Micropower Sweden AB occasionally employs people between the age of 16 and 18, primarily during the summer school holidays (feriearbete). Hence, we will assess risks in this area. We also host internships (prao) for primary school students between the age of 14 and 15 who spend short periods of time with us and perform light tasks with a focus on observation and education. Further, we occasionally host students under the age of 18 pursuing a specialised education related to our field during limited periods in relation to their school curriculum (praktik). In relation to our value chain, we acknowledge that there have been historical challenges in relation to exploitative child labour in the extraction/mining industry, most commonly found in artisanal and small-scale mines. Micropower Sweden AB has a zero tolerance to any form of exploitative child, forced, or compulsory labour and has responsible sourcing practices in place. We require suppliers to not engage in, or benefit from, the use of child labour, in accordance with the ILO convention 138. We have not experienced occurrences of actual adverse impacts in relation to exploitative child labour in our value chains. Should this change, we will reassess this area. We also note that adverse impacts to this human right are severe by nature. See also HuRi 15: Right to liberty and security of a person, concerning conflict minerals.</p>
Identified stakeholder(s)	- Employees under the age of 18

Impact management:

Actions to engage with affected stakeholder(s)	- Employee development talks - Grievance mechanisms - Workplace assessments - Employee representatives - Staff survey - Staff training - Onboarding of new employees - Employment contracts
Actions to cease, prevent and/or mitigate the adverse impact	<p>Micropower Sweden AB: - Complies with relevant work environment regulations in relation to this right. (AFS (Arbetsmiljölföreskrift) 2012:3 bilaga 1, stipulating restrictions concerning the working conditions of employees and students in our care below the age of 18, working hours, including tasks, ergonomics, responsibilities and exposure.) - Ensures that people under 18 are offered employment with a guardian's permission only. - Ensures that employees or students in our care under 18's work hours do not exceed 40 hours per week. - Ensures that employees or students in our care under 18 never work alone. - Ensures that employees or students in our care under 18 never work evenings. - Ensures that employees or students in our care under 18 do not work with, or are exposed to, chemicals or hazardous substances. - Ensures that employees or students in our care under 18 do not perform work with machinery. - Ensures that employees under 18 receive proper compensation in alignment with union agreement. - Ensures that employees under 18's work won't affect school attendance.</p>
Indicators of effectiveness	1. Number of reports/grievances on the right to children's and young people's protection from exploitation (employees). 2. Number of reports/grievances on the right to children's and young people's protection from exploitation (Other). 3. Results from staff survey.
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- In Job listings - Access to impact assessments inviting for ideas or grievances - Code of Conduct for Employees (CoCE) - Code of Conduct for Business Relationships (CoCBBR) - Website - PR-material - Intranet - Social media - Staff handbook

▲ 13.a. Right not to be subjected to torture, cruel, inhuman and/or degrading treatment or punishment

IMP NO #SRMT85DY

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impacts on the right to not be subjected to torture, cruel, inhuman and/or degrading treatment or punishment (harassment). We employ a large body of employees that may express views in the workplace, to customers, or in public - that amount to harassment. We further recognise that degrading treatment can occur anywhere, through harassment, sexual harassment, bullying, threats, physical or psychological violence, or similar. Confer also: - HuRi 2. Right to non-discrimination - HuRi 25.b. Right to freedom of expression
Identified stakeholder(s)	- Employees - Business relationships - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 2: Right to non-discrimination Micropower Sweden AB: - Does not accept any form of intimidating or disrespectful behaviour, bullying, harassment, unwanted sexual advances or discrimination. (MP Code of Conduct for Managers and Employees) - Has policy that prohibits harassment and degrading treatment. - Has clearly outlined procedures, routines and consequences in case of occurrence. Consequences range from issued warnings to termination of employment. - Encourage a positive work environment, where everyone is appreciated, respected and valued for their differences. (MP - Code of Conduct) - Follows up on any reported incidents of harassment. - Encourages all employees to speak up if they experience or see impacts in relation to this right and ensures that employees who speak up are not met by reprisals by management or colleagues. - Has a whistleblower mechanism in place.
Indicators of effectiveness	1. Number of grievances/reports on the right not to be subjected to torture, cruel, inhuman and/or degrading treatment (harassment)
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

▲ 14. Right not to be subjected to slavery, servitude or forced labour

IMP NO #B3LFYYHR

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we are not at risk of adverse impacts on the right not to be subjected to slavery, servitude or forced labor. We are not in an industry or environment where there have been risks in relation to this right. We always allow employees to freely leave their job and we do not offer loans to employees. We have not, at any time experienced that we were linked to adverse impacts on this right. However, we seek to have our business relationships meet the minimum standard for responsible business conduct (i.e. adhering to the UN Guiding Principles) and explicitly state in our code of conduct for suppliers that suppliers must not engage in modern slavery related activities, such as using force, threats or deception to get a person to work; destroying or otherwise denying access to an employee's identity or immigration documents; charging employees recruitment fees; and failing to provide an employment contract. We further acknowledge that adverse impacts on this right are classified 'severe' by nature. See also HuRi 15. Right to liberty and security of person, which concerns conflict minerals.

Compliance Report

▲ 15. Right to liberty and security of person

IMP NO #ICNKMZ1N ●

Impact identification:

Impact type	Potential
Connection to impact	May be linked
Description	Micropower Sweden AB assesses that we are not at risk of causing or contributing to adverse impacts on the right to liberty and security of a person. We do not employ security personnel, and do not provide products that could result in adverse impacts on this right. Micropower Sweden AB assesses, however, that we may be linked to severe adverse impacts on the right to liberty and security of person in relation to conflict minerals. Whilst we do not import any conflict minerals into the EU, we use minerals (including tantalum, tin, tungsten, gold and cobalt) in our products, which are acquired through our business relationships and may be associated with extraction and trade in conflict zones. Despite the fact that we are yet to experience any actual, known severe adverse rights impacts on this right, the dealing with these minerals may be linked to multiple human rights issues including the financing of conflicts.
Identified stakeholder(s)	- People in conflict areas

Impact management:

Actions to use and/or build our leverage to make our business relationships address the impact	Micropower - Makes use of the Conflict Minerals Reporting Template (CMRT) and Extended Minerals Reporting Template (EMRT), developed by the Reporting Minerals Initiative, facilitating transfer of information throughout supply chains, identifying pinch points and collect due diligence information in conflict minerals supply chains (MP - Declaration for Minerals Regulation) - Expects business relationships to exercise adequate due diligence with respect to sourcing, extraction and handling of Conflict Minerals (tantalum, tin, tungsten, gold and cobalt) and to make a reliable determination of the origin and source of such minerals. - Requires suppliers to have a policy and process in place to ensure that any of the above minerals contained in the products manufactured by the Supplier do not directly or indirectly finance or benefit armed groups that are perpetrators of human rights abuses or in any other way directly or indirectly contribute to human rights violations (gross impacts). (MP - Supplier CoC) Micropower will: - Consider updating our CoC for Business Relationships/Suppliers - Review our Conflict Minerals Policy in light of the EU Conflict Minerals Regulation. - Include a reference to the American legislation on conflict minerals: Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Act of 2010.
Indicators of effectiveness	1. % of suppliers from whom IRMA certifications are received Planned actions: 2. Updating CoC: Decision 3. Systems looked into 4. Conflict Minerals Policy reviewed 5. Reference included
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //

▲ 23. Right to privacy

IMP NO #DFZSWSEG

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impact on the right to privacy. We rely on technology to collect, store and manage information, including personal information. Risks may concern: - Collecting and storing information (personal data) on employees and other stakeholders. - Not adequately informing the employees about our surveillance (internet use, accessing emails, etc.). - Not ensuring that people are aware of for is what their information is used, how and where it is stored, how individuals can access their information, or whether individuals have possibilities to change their data storage settings (GDPR). (See also HuRi 25c: Right to freedom of information).
Identified stakeholder(s)	- Employees - Business partners - Customers - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Employee development talks - Grievance mechanism - Hiring procedures - Employee representative - Employee survey - Contract of employment - Hiring procedures - Individual talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	See also HuRi 25c: Right to freedom of information. Micropower Sweden AB: - Has technical and organisational security measures in place to mitigate this risk, including policies, guidelines and procedures. - Enable necessary staff's access to systems with personal data and seeks to ensure that access to personal data is limited to retrieve only necessary information. - Has a privacy policy which clearly stipulates how Micropower Sweden AB collects, processes, transfers and stores data. The policy further includes information on the types of data processed, including the purposes of specific data in relation to business processes and objectives. - Has a data security training platform (Nimble). - Has a personal data routine and procedure policy. - Ensures that the privacy policy, includes information on applicable regulation and clarifies the legal person's access to their data. - Informs stakeholders, in the privacy policy, how they may object and submit complaints concerning personal data. - Strives to always process personal data within the EU or EEA, when possible. - Has an IT policy describing our overall intent in preventing, detecting and managing cyber attacks and thereby protecting the organisation's information, assets and technical infrastructure. This includes regular risk assessments and management of security incidents. - Requires suppliers to inform Micropower Sweden AB in case on any security breaches or deviations that involves personal data of relevance to Micropower. Micropower Sweden AB will: - Consider this right in relation to transition of roles and means of securing correct access, and revoking thereof where necessary. - Consider regular trainings concerning data management, covering requirements concerning the storing and processing of personal data. - Consider the right to privacy when adjusting policies, routines and procedures in relation to video surveillance, as applicable due to move to new facilities.
Indicators of effectiveness	1. Number of open risks in annual audit reports 2. Number of whistleblower reports on the right to privacy (employees) 3. Number of confirmed information security incidents 4. Number of grievances or complaints in relation to this right 5. Number of reports to the Swedish data protection authority ('Integritetsskyddsmyndigheten') 6. Cybersecurity risk assessment/external audit completed
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- In Job listings - Employment contracts - Access to impact assessments inviting for ideas or grievances - Code of Conduct for Employees (CoCE) - Intranet - Employee handbook

▲ 25.b. Right to freedom of expression

IMP NO #N2XBFL1B

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risk of adverse impacts on the right to freedom of expression by: - Establishing unclear limitations for employees' possibilities to express themselves about the company's circumstances (for example, confidential information on the company). - Not clearly describing what and how employees are expected to communicate about the company on social and public media. - Limiting what employees can say to other employees and customers in order to prevent adverse impacts on other rights (see also HuRi 2: Right to non-discrimination; HuRi 13a: Degrading treatment; HuRi 26b: Hate speech). - Removing offensive or business unrelated comments from social media platforms, controlled by Micropower Sweden AB.
Identified stakeholder(s)	- Employees - General public

Impact management:

Actions to engage with affected stakeholder(s)	- Hiring and recruitment procedures - Monthly employee satisfaction survey - Procurement procedures - Sales and marketing procedures - Company websites - Grievance mechanism and access to impact assessments - Individual employee talks (1:1) - Exit interviews
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Does not accept any form of intimidating or disrespectful behaviour, bullying, harassment, unwanted sexual advances or unlawful discrimination. - Ensures to restrict employees' freedom of expression only where necessary, i.e. regarding company, client secrets, or expressions that amount to degrading treatment, harassment, or discrimination. - Has an attachment to employment contract where relevant, that clearly states what information employees need to keep confidential. - Has guidelines on social media usage in relation to limitations in IT policy and Code of Conduct for employees. - Expects employees to adhere to the inherent duty of loyalty (lojalitetsplikt), creating limitations to this right. Breach of the duty of loyalty is considered a material breach of the employment agreement, and may lead to termination of employment or instant dismissal. - Includes a link in IT policy to a information classification policy, covering definitions of confidentiality. - Expects employees to use our brand, patents, trademarks, know-how, and copyrights responsibly and as instructed. - Expects employees not to comment on information received within the company, outside the company in speech, social media or any other media. - Informs employees about limitations of expressions in public forums or on social media platforms, when such expressions can be associated with Micropower Sweden AB. Micropower Sweden AB will: - Consider informing users of Micropower Sweden AB's social media platforms about limitations of expressions accepted on such platforms. See also: - HuRi 2. Right to non-discrimination - HuRi 13a: Degrading treatment (harassment) - HuRi 26.b. Right to freedom from incitement of racial, religious or national hatred
Indicators of effectiveness	1. Number of whistleblower reports on the right to freedom of expression (employees) 2. Number of whistleblower reports on the right to freedom of expression (Others) 3. Information about limitations to this right included on company social media for users outside of Micropower Sweden AB
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate our actions to the relevant stakeholders	- Job listings and recruitment procedures - Employment contracts - Access to impact assessments - Code of Conduct for Managers and Employees (CoCE) - Intranet - Employee handbook - Code of Conduct for Suppliers - Supplier Manual and Supplier Portal and contracts - Sustainability Report - Company websites - Town hall meetings - Social media channels run by Micropower Sweden AB

Methodology for Sustainability Due Diligence

Scope of this report

We appreciate that all companies, no matter where they operate or what they do, are at risk of sustainability impacts, and we intend to assess our business units at operational level or – where applicable – at representative level. This report is for Micropower Sweden AB.

To make this report, we have assessed adverse impacts that Micropower Sweden AB has or may have on each of the 20 environmental areas. We focus our assessments on the more likely impacts, not all imaginable impacts.

Where an actual impact occurs or has occurred, it is treated as an actual impact, and where an impact remains a risk only, such risk of an adverse impact is treated as potential. We focus assessments on where Micropower Sweden AB may 'cause' or 'contribute to' adverse impacts.

In case of multiple impacts on the same environmental area, each adverse actual or potential impact is treated separately.

Where we identify risks, we describe where the risks occur; what we do, or will do, to prevent or mitigate the risk; the indicators by which we measure effectiveness; who oversees managing the risk; and any additional resources that need to be allocated where added actions are deemed necessary or commendable.

Where we find 'no risks' of adverse impacts, we describe why we reached such conclusion.

This report consists of 20 impact assessments against all 20 environmental areas and constitutes a 100% complete environmental impact assessment for Micropower Sweden AB.

Micropower Sweden AB has identified a total of 6 impacts on 6 environmental areas. Of the identified impacts, we have 6 potential and no actual impacts.

We found that we have no risk of impacts on 14 of the 20 environmental areas.

Compliance Report

Results of our impact assessment

What we have identified

The 6 impacts were identified on the following 6 environmental areas:

- 2. Use of energy (1)
- 3. Use of raw materials (in particular, scarce natural resources) (1)
- 6. *Transition to a circular economy (previously handling and transportation of dangerous substances) (1)
- 9. *Climate change mitigation (previously air emissions) (1)
- 17. Handling, transportation and waste management of hazardous substances (previously Waste Management of Hazardous Substances) (1)
- 20. Use and diffusion of environmentally friendly technologies (Previously diffusion of environmentally friendly technologies) (1)

Each impact assessment is listed below in order of the environmental areas.

Compliance Report

▲ 1. *Sustainable use and protection of water and marine resources (previously water consumption)

IMP NO #BX6J9WW1

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we are not at risk of significant impacts in relation to 'Sustainable use and protection of water and marine resources'. We do not use significant amounts of water in our production facilities, nor in our office environments. Neither our operations nor products entail a significant risk to the protection of marine resources. We note that although water is not a scarce resource in Sweden, the public water system has put a price to the consumption of water prompting both consumers and businesses to reduce water consumption. We further note that water is used in large quantities in the extraction industry, and ask that our suppliers monitor, track and document its consumption of natural resources such as water and raw materials. Should we experience any actual, significant impacts in our value chain that we are linked to, this area will be reassessed.

Compliance Report

2. Use of energy

IMP NO #T38AMSW0

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'use of energy'. We use high amounts of energy in our daily operations and we are deeply dependent on the use of energy. Further, we may contribute to significant impacts in this area, as Micropower Sweden AB's core business consists of development, design, manufacturing and distribution of batteries, chargers and additional related products. We acknowledge that efficient use of energy is a key sustainability issue and we take this into consideration in all our processes, the efficiency and design of our products, and manufacturing processes.
Identified location(s)	- Headquarters - Production sites - Products (customers)

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	(Concerning our products and their impact on the use of energy, confer area 20: Use and diffusion of environmentally friendly technologies and area 9: Climate change mitigation (scope 2)) Micropower Sweden AB: - Is committed to design systems and products with high efficiency, high energy density and a long lifespan, continuously improving to reduce energy consumption and the CO2 footprint of the customers application. - Keeps sustainability and energy efficiency as a key focus area in the design, development and manufacturing of products. - Seeks to minimise the use of energy for operations/manufacturing. - Holds ISO 14001 certifications for all sites, which includes continuous improvement of energy optimisations. - Makes active choices in purchasing of energy, prioritising fossil-free electricity to the extent possible. - At our Växjö site, we have an agreement with the local energy company Växjö Energi AB, which will supply the factory with locally produced, renewable energy (includes district heating, district cooling and ground heat). - Powers all sites in Sweden with renewable energy, and our battery module factory has a solar panel facility that produces approximately 130 kWh/year. - Chooses modern production equipment and estimates the energy consumption to minimise the risk of unnecessary energy waste. - Measures energy usage - purchased electricity and purchased thermal energy, incl. remote heating (MP - Sustainability Report) - Has installed solar panels at our new battery and charger factory, expected to produce 495 kWh/year. - Has set a an annual target to reduce the amount of purchased electricity by 2%, with 2023 as the baseline.
Indicators of effectiveness	1. Total energy usage (own operations) 2. Results of ISO 14001 inspections 3. Use of fossil-free electricity 4. 2% annual reduction target reached
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate to the relevant authorities	**Note** // Only when relevant, should actions to communicate to authorities be described. //

Compliance Report

3. Use of raw materials (in particular, scarce natural resources)

IMP NO #JTR0ZSYQ

Impact identification:

Impact type	Potential
Connection to impact	May contribute
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'use of raw materials'. We do not use any raw materials in our operations, however, we purchase components that include raw materials, e.g. lithium, nickel, cobalt, aluminium oxides. Hence, we will assess that we may contribute to adverse impacts in this area. We are aware that some raw materials may derive from conflict zones, and whilst we do not import conflict minerals into the EU ourselves, we have rigid requirements and processes in place to mitigate risks in relation to this. It remains a significant risk, not least in relation to human rights. See HuRi 15. Right to liberty and security of person for more information on conflict minerals.
Identified location(s)	- Headquarters - Production sites

Impact management:

Actions to use and/or build our leverage to make our business relationships address the impact	Micropower Sweden AB: - Requires selected first tier business relationships to conduct due diligence, including assessing risks in this area as applicable. - Requires our selected first tier business relationships to require from their next tier business relationships that they conduct due diligence.
Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Are aware of our responsibility along the supply chain. - Seeks to minimise use of raw materials when possible. - Makes use of the CMRT (Conflict Minerals Reporting Template) and EMRT (Extended Minerals Reporting Template) that has been developed by the internationally recognised initiative RMI (Responsible Minerals Initiative) in our supply chain management. Micropower Sweden AB will: - Seek to purchase recycled materials for packaging whenever possible. - Seek to exclude plastic in packaging. - Update CoCBR and Supplier Manual with reference to UNGPs/OECD guidelines and DD.
Indicators of effectiveness	1. Use of raw materials 2. Results of ISO 14001 inspections 3. Reported/known incidents in our value chain 4. CoCBR updated with references 5. Supplier Manual updated with references
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate to the relevant authorities	**Note** // Only when relevant, should actions to communicate to authorities be described. //

Compliance Report

Additional information:

Additional notes	**No external notes registered**
Assigned responsible person	Therese Adenmark Sustainability Manager
Assigned resources	Actions: 2 Day(s) - Update CoCBR and Supplier Manual with reference to UNGPs/OECD guidelines and DD. Continuous processes, no additional resource allocation required: - Seek to purchase recycled materials for packaging whenever possible - Seek to exclude plastic in packaging
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

▲ 4. Use of chemicals

IMP NO #JZF7WERL

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we are not at risk of significant impacts in relation to 'use of chemicals'. We do not use significant amounts of chemicals in the daily operations of our manufacturing, or in our office environments. Confer 17: Handling, transportation and waste management of hazardous substances.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

▲ 5. Use of ozone depleting substances or Persistent Organic Pollutants

IMP NO #6QU994S0

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have significant impacts in relation to 'use of ozone depleting substances or Persistent Organic Pollutants'. Our facilities were established long after the global ban of ozone depleting freon and the stop of production of cooling elements with ozone depleting freon* and we do not use persistent organic pollutants (POPs). *The productions of cooling elements was banned from 1995, and from 2014 repairing cooling elements with ozone depleting freon was also banned.

Additional information:

Additional notes	<i>**No external notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

▲ 6. *Transition to a circular economy (previously handling and transportation of dangerous substances)

IMP NO #7ZJZ6PZF

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have significant impacts in relation to the transition to a circular economy. We operate in an industry where circularity is a key focus, especially with regard to the use of minerals. We acknowledge the EU Battery Regulation and its aim to extend the end-of-life (EoL) focus and promoting circularity in the battery sector. See also area 2: Use of energy.
Identified location(s)	- Production sites - Business relationships (own and business relationships) - Customers and end-users

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Has included circularity as a focus area for our business development, and will continue to put emphasis on this. - Collaborates with businesses who specialise in the collection of our products by EoL. - Ensures that our batteries include clear instructions for efficient EoL collection (free for end users). - Collaborates with our business relationships to increase the levels of reused minerals, with a focus on cobalt, lead, lithium and nickel in alignment with the EU Battery Regulation. - Designs our products in a manner that ensures, and continuously improves, lifespan, efficiency and recycling possibilities. - Considers access to green energy of manufacturing locations when selecting suppliers of battery cells. - Ensures to include relevant information, including the above mentioned areas, in relation to our products, and seeks to provide this through a product passport format when available.
Indicators of effectiveness	1. Number of reported reports/grievances related to this area 2. Number of business relationship engagements related to this area
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate to the relevant authorities	**Note** // Only when relevant, should actions to communicate to authorities be described. //

Approved on	24-01-2025 by Louise Karlsson

Compliance Report

7. Soil and groundwater emissions (Previously emissions to surface and groundwater)

IMP NO #B4HSK6GF

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that are not at risk of significant impacts in relation to 'emissions to soil and groundwater'. Whilst we operate production facilities, where spillages can occur, we assess the risk of such spillages contaminating groundwater or soil to be minimal. Hence, we assess that there are no significant risks of impacts. We recognise that the extractive industry industries may face challenges concerning this area, as water is used in large quantities and may pose a challenge in exploration, extraction, processing, ground water exposure, in relation to rainfall and related operations. This may lead to contamination. We require our business relationships to manage their risks in all environmental areas, including soil and water emissions.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

8. Surface water emissions (previously emissions into soil)

IMP NO #ZTJEEUNW

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'surface water emissions'. We acknowledge that we operate in production facilities, where spillages into soil can occur. As our production sites are located close to water surfaces, additional risks may be present in case of flooding. Hence we assess that there could be a significant risk of impact. (See also Areas 7, 15 and 16).

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM

Compliance Report

▲ 9. *Climate change mitigation (previously air emissions)

IMP NO #V9LV14AR

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant adverse impacts in relation to 'climate change mitigation'. We develop technologies (batteries and charging systems) and have a key focus on creating sustainable energy solutions for the future, therefore, we will assess our impacts in this area. We further acknowledge that our core operations and products have a key focus on driving electrification in industrial sectors, which leads to positive impacts in this area.
Identified location(s)	- Headquarters - Production sites

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	(See also Area 2: Use of energy) Micropower Sweden AB: - Uses the Green House Gas (GHG) protocol to measure and calculate our emissions and measures Scope 1 and 2 with high precision. (MP - Sustainability Report) - Operates in an industry focused on climate change mitigation. - Calculates our scope 3 emissions using GHG protocol. - Aims to become CO2-neutral by 2045. - Uses a HVO100-powered loop truck for local supplier transportations, resulting in CO2 savings. - Uses a transport supplier which provides climate-smart options for our transports, including increased traceability of transported goods and climate impact. - Owns 2 company cars, both of which are powered by electricity. - Measures GHG leaks from cooling units. - Encourages employees to travel by train, bus, or car instead of air travel, wherever the distances allow. - Encourages all employees to act with environmental awareness. - Makes use of technological solutions, including virtual meetings, to reduce the need for travel. - Encourages less traveling (based on necessity) both for financial and environmental reasons. - Is in continuous dialogue with our upstream and downstream business relationships on the topic of emissions and climate change. - Encourages our suppliers to include information about products' CO2 footprint per article in purchasing processes. - Is seeking to prioritise near-sourcing, as to reduce the environmental footprint of transportation to our facilities, and includes this in our purchasing strategy. See area 20: Use and diffusion of environmentally friendly technologies, for further information concerning our products.
Indicators of effectiveness	1. Total emissions scope 1 2. Total emissions scope 2 3. Total emissions scope 3 4. Number of company cars powered by electricity 5. Use of flights per. employee 6. GHG leaks from cooling units

▲ 10. Noise emissions and light emissions

IMP NO #XZZX3IIV

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to 'noise emissions and light emissions'. Our production facilities are located in industrial areas and are only running during business hours. Additionally, we operate in an industry where noise and light emissions are not a known issue, nor have we received complaints related to this area.

Additional information:

Additional notes	<i>**No Notes registered**</i>

Compliance Report

▲ 11. Odour and dust emissions

IMP NO #W4X34M8R

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to odour emissions. We do not emit odours or dust in our daily operations, and we have never received complaints.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

▲ 12. *Pollution, prevention and control (previously dust emissions)

IMP NO #MG5INFHF

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB does not assess that whilst we may have risks of adverse impacts in relation to pollution, prevention and control, these are not deemed significant. Our risks related to this area concern air emissions, waste management and handling/transportation of hazardous substances and are described and managed under area 2, 6, 7, 9 and 17. We acknowledge that our core operations core operations and products have a key focus on driving electrification in industrial sectors, which leads to positive impacts in this area (See also Environmental area 2: Use of energy and area 20: Use and diffusion of environmentally friendly technologies).

Approved on	24-01-2025 by Louise Karlsson

Compliance Report

▲ 13. *Protection and restoration of biodiversity and ecosystems

IMP NO #678QTTEB

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to biodiversity and ecosystems. We do not use products or other in our operations that would amount to a risk of significant impacts on biodiversity. We do, however, acknowledge that this area links to our risks concerning waste management, hazardous substances and climate change. We refer to these areas and the prevention and mitigation of adverse impacts thereof.

Compliance Report

▲ 15. Wastewater management

IMP NO #AUG0EMJQ

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we are not at risk of significant impacts in relation to 'waste management of water'. We do not use significant amounts of water in our production facilities nor offices, and do not dispose of significant amounts of water, which warrants management. We acknowledge that wastewater management may be an issue in production and extraction in our upstream value chain, and require our business relationships to manage this risk.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

▲ 16. Solid waste management

IMP NO #0BFHF6GI

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we are not at risk of significant impacts in relation to 'waste management of solid waste'. Whilst there is waste generated in our daily operations, mainly at our offices and production sites, this is not of a quantity that amounts to a significant impact. We appreciate that Swedens legislation is continuously improving recycling requirements and works with a partner to ensure adequate and effective recycling of fractions. We acknowledge that our products generate waste at the end of their lifecycle. Confer environmental Area 17: handling, transportation and waste management of hazardous substances and Area 6: transition to a circular economy.

Compliance Report

17. Handling, transportation and waste management of hazardous substances (previously Waste Management of Hazardous Substances)

IMP NO #7XX00L06

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'waste management of hazardous substances'. We handle, transport and manage hazardous substances in our production processes, as well as generate waste in our operations that contain hazardous substances and need to be handled with caution. We therefore assess this to be a significant risk. Further, our products contain hazardous substances and must be dealt with in an adequate manner throughout their lifecycle, and at EoL. See also HuRi 9: Right to health and area 6: Transition to a circular economy.
Identified location(s)	- Production sites - Business partners (transportation, supply and distribution) - End users (at the end of product lifecycle)

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Is compliant with relevant chemical regulations. - In alignment with RoHS, complies with allowed exemptions. - Reports according to SCIP in alignment with REACH regulation. - Measures the amount of hazardous waste managed. - Has clear instructions, trainings, SOPs and policies concerning the management of hazardous substances. - Has procedures in place to track deviations. - Has a procedure in place for educating (new) employees on management of hazardous substances. - Includes clear instructions in product material and information for customers in order to ensure correct handling of products and waste management of components containing hazardous substances. Micropower Sweden AB will: - Look into data disclosures of hazardous waste in light of upcoming regulations. See also HuRi 4.c. Right to safe and healthy working conditions, HuRi 9: Right to health, and environmental area 6. Transition to a circular economy.
Indicators of effectiveness	1. Number of deviation reports 2. Number of reports/grievances in relation to this area 3. Amount of hazardous waste 4. Results of ISO 14001 inspections 5. Percentage of products with instructions for recycling/disposal 6. Data disclosures looked into
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate to the relevant authorities	**Note** // Only when relevant, should actions to communicate to authorities be described. //

20. Use and diffusion of environmentally friendly technologies (Previously diffusion of environmentally friendly technologies)

IMP NO #FD8ZJE7N

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'use and diffusion of environmentally friendly technologies'. We develop, produce and hold patents for environmentally friendly technology (energy-efficient batteries and charging systems), including investing in, and R&D of more efficient Lithium-ion batteries. Our customers further rely on us to drive development and mitigate risks in this area. See also area 2: Use of energy.
Identified location(s)	- Customers and potential customers - End users - Other manufacturers in the field

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Has a core business focus on the production and distribution of environmentally friendly technologies. - Utilises environmentally friendly technologies in our production processes (see also area 2: Use of energy) - Operates in a highly competitive market, and upholds a business model that makes the diffusion of environmentally friendly technologies accessible. - Only holds patents for design and efficiency of products using existing technologies and science. See also area 2: Use of energy.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Number of patents held

Methodology for Sustainability Due Diligence

Scope of this report

We appreciate that all companies, no matter where they operate or what they do, are at risk of sustainability impacts, and we intend to assess our business units at operational level or – where applicable – at representative level. This report is for Micropower Sweden AB.

To make this report, we have assessed adverse impacts that Micropower Sweden AB has or may have on each of the 16 economic areas. We focus our assessments on the more likely impacts, not all imaginable impacts.

Where an actual impact occurs or has occurred, it is treated as an actual impact, and where an impact remains a risk only, such risk of an adverse impact is treated as potential. We focus assessments on where Micropower Sweden AB may 'cause' or 'contribute to' adverse impacts.

In case of multiple impacts on the same environmental area, each adverse actual or potential impact is treated separately.

Where we identify risks, we describe where the risks occur; what we do, or will do, to prevent or mitigate the risk; the indicators by which we measure effectiveness; who oversees managing the risk; and any additional resources that need to be allocated where added actions are deemed necessary or commendable.

Where we find 'no risks' of adverse impacts, we describe why we reached such conclusion.

This report consists of 16 impact assessments against all 16 economic areas and constitutes a 100% complete economic impact assessment for Micropower Sweden AB.

Micropower Sweden AB has identified a total of 3 impacts on 3 economic areas. Of the identified impacts, we have 3 potential and no actual impacts.

We found that we have no risk of impacts on 13 of the 16 economic areas.

Results of our impact assessment

What we have identified

The 3 impacts were identified on the following 3 economic areas:

- 3. Bribes to or corruption of private counterparts (1)
- 8. Offering or accepting gifts beyond stated value (approvals) (1)
- 11. Abstain from cronyism and nepotism (1)

Each impact assessment is listed below in order of the economic areas.

Compliance Report

▲ 1. Accurate books and records, including data on income from past five years

IMP NO #AEGR5Z3M

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to accurate books and records, including data on income from past five years. We store all bookkeeping for at least seven years, as required by Swedish law. Further, we are subject to external, annual financial audits by reputable third-parties and have not received any remarks during the past 5 years. Therefore, we do not assess this to be a risk of significant impact.

Additional information:

Additional notes	<i>**No external notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

▲ 2. Bribes to or corruption of public officials

IMP NO #9MTSUL5M

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to bribes to or corruption of public officials. Micropower Sweden AB is not dependant on special collaboration or approvals from the authorities, hence we do not assess this to be a significant risk.

Additional information:

Additional notes	<i>**No Notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

3. Bribes to or corruption of private counterparts

IMP NO #D37GMTJV

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to the area of bribes to or corruption of private counterparts. Micropower Sweden AB works in close partnership with a range of business relationships, and we are greatly dependant on these partnerships. We cannot rule out that benefits will be sought through bribery. (See also Area 8: Offering or accepting gifts)
Identified location(s)	- Headquarters - Business Partners

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Is committed to conducting business with high integrity and has zero tolerance for all forms of bribery and corruption. - Is committed to the fight against corruption throughout our operations, which also includes our suppliers. - Does not directly, or indirectly through third-parties acting on our behalf, pay or offer to pay bribes. - Has a code of conduct for suppliers which addresses this area. - Covers this area in our employee code of conduct. - Trains employees in this area as a part of our onboarding process, and repeats trainings when relevant. Micropower Sweden AB will: - Consider formalising training for most relevant staff, i.e. procurement, sales and executive management, to be repeated regularly.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Formalising training: Decision
Results of tracking effectiveness based on the indicators	<i>**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //</i>
Actions to communicate to the relevant authorities	<i>**Note** // Only when relevant, should actions to communicate to authorities be described. //</i>

Additional information:

Additional notes	<i>**No external notes registered**</i>
Assigned responsible person	Annika Undin HR Manager
Assigned resources	Considerations: 1 Day(s) - Consider formalising training for most relevant staff, i.e. procurement, sales and executive management, to be repeated regularly.
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

4. Trading in influence in relation to business partners, government officials or employees

IMP NO #D4KKR180

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to trading in influence in relation to business partners, government officials or employees. We do not have the market share or power to influence that would make trading in influence a likely risk.

Additional information:

Additional notes	<i>**No Notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

5. Bribes, corruption or trading in influence through the use of intermediaries

IMP NO #F7JHPH0Y

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to bribes, corruption or trading in influence through the use of intermediaries. Micropower Sweden AB ensures that all interactions with intermediaries are properly accounted for, and we only work with reputable intermediaries (accountants, law firms etc.).

Additional information:

Additional notes	<i>**No Notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

6. Use of facilitation payments, unless you are subject to threats or other coercion

IMP NO #SHSPGOQ1

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to the use of facilitation payments, unless you are subject to threats or other coercion. Facilitation payments are known not to be a challenge in Sweden, where we operate.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

7. Political contributions, charitable donations and sponsorships in expectation of undue advantages

IMP NO #NG68XO7P

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to political contributions, charitable donations and sponsorships in expectation of undue advantages. We do not support political parties through donations or sponsorships. Any charitable donations and sponsorships are subject to the four-eye principle and are never used to obtain undue advantages.

Additional information:

Additional notes	**No Notes registered**
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

8. Offering or accepting gifts beyond stated value (approvals)

IMP NO #AF72OWPR

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to 'offering or accepting gifts beyond stated value (approvals)'. We may be in a position to give or receive gifts of a size that could influence business decisions.
Identified location(s)	- Headquarters (incl. sales and procurement) - Business Relationships

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Is committed to conducting business with high integrity and has zero tolerance for all forms of bribery and corruption. - Does not offer or accept gifts that will improperly influence our business decisions or those of our partners. - Encourages employees to make use of the four-eye principle when in doubt concerning this area. (MP - Code of Conduct) Micropower Sweden AB will: - Consider developing procedures, clarifying and regulating requirements, approval processes and value limits for internal and external gifts and donations (both giving and receiving). - Consider developing a gift-registry for high value gifts.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. Procedures for gifts: Decision 3. Gift registry: Decision
Results of tracking effectiveness based on the indicators	<i>**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //</i>
Actions to communicate to the relevant authorities	<i>**Note** // Only when relevant, should actions to communicate to authorities be described. //</i>

Additional information:

Additional notes	<i>**No external notes registered**</i>
Assigned responsible person	Annika Undin HR Manager
Assigned resources	Considerations: 2 Day(s) - Consider developing procedures, clarifying and regulating requirements, approval processes and value limits for internal and external gifts and donations (both giving and receiving). - Consider developing a gift-registry for high value gifts.
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

Compliance Report

9. Permitting or participating in money laundering

IMP NO #WN0R4GWG

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks significant impacts in relation to 'permitting or participating in money laundering'. We do not run a business that is at risk of allowing or making possible money laundering, as we do not handle cash, nor work in an industry where this is a known risk.

Additional information:

Additional notes	<i>**No Notes registered**</i>
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

10. Hiring government employees for jobs relating to former areas of responsibility

IMP NO #9ZEO8DTV

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to 'hiring government employees whose jobs conflict with obligations of such employees'. We do not offer positions that would be relevant to government employees, nor do we have experience with hiring government officials. However, should Micropower Sweden AB hire any (former) government employees, we will reassess this area.

Additional information:

Compliance Report

▲ 11. Abstain from cronyism and nepotism

IMP NO #C1KZ1XRA

Impact identification:

Impact type	Potential
Connection to impact	May cause
Description	Micropower Sweden AB assesses that we may have risks of significant impacts in relation to abstaining from cronyism and nepotism. Micropower Sweden AB hires employees and makes use of contractors that may have both personal and business partnerships with existing Micropower Sweden AB employees. This further concerns promotions and other types of benefits. We have developed, and are still developing, close relationships and networks within our industry (See also Area 3: bribes to private counterparts). We acknowledge that we employ temporary (summer) workers as needed, who usually have relationships with Micropower Sweden AB employees.
Identified location(s)	- HR-recruitment - Employment - Promotions - Contracting and Consulting - Business relationships

Impact management:

Actions to cease, prevent and/or mitigate the adverse impact	Micropower Sweden AB: - Clearly includes nepotism/cronyism in our code of conduct for employees. - Ensures that anyone who recommends friends or family relationships for an internal position or as a supplier/ contractor shall not be involved in the decision-making. - Ensures that decisions concerning recruitment and promotions are made with regard to skills, qualifications and experience (see also HuRi 3: Right to work (contract)). - Applies the four-eye principle when selecting new suppliers for direct material. Micropower Sweden AB will: - Update the CoCE with our position on nepotism and cronyism, and what that means in practice. - Consider formalising procedures to restrict and limit nepotism or cronyism in recruitment/ procurement processes.
Indicators of effectiveness	1. Number of reports/grievances in relation to this area 2. CoCE updated to cover this area 3. Formalising procedures: Decision
Results of tracking effectiveness based on the indicators	**Note** // Results of tracking effectiveness based on the listed indicators should be described, but it is common not to have tracking results to describe in this first version of the impact assessment. //
Actions to communicate to the relevant authorities	**Note** // Only when relevant, should actions to communicate to authorities be described. //

Compliance Report

Additional information:

Additional notes	**No external notes registered**
Assigned responsible person	Annika Undin HR Manager
Assigned resources	Actions: 2 Day(s) - Update the CoCE with our position on nepotism and cronyism, and what that means in practice. Considerations : 1 Day(s) - Consider formalising procedures to restrict and limit nepotism or cronyism in recruitment/ procurement processes.
Follow up date	Mar 1 2026 12:00AM
Approved on	24-01-2025 by Louise Karlsson

▲ 12. Clearly define job duties based on skills, qualifications and experience

IMP NO #AX02PVTL

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have risks of significant impacts in relation to 'clearly define job duties based on skills, qualifications and experience'. Any risks in relation to this area are managed under HuRi 4: Right to enjoy just and favourable conditions of work. We acknowledge that the activities of Micropower Sweden AB demand clear and defined competencies, due to the industry we operate in. (See also Area 11: Abstaining from cronyism and nepotism, HuRi 3: Right to work and HuR 2: Right to non-discrimination).

Impact identification:

Impact type	No impact
Description	Micropower Sweden AB assesses that we do not have significant impacts in relation to tax avoidance. Our company structure is transparent and does not include entities that are listed in tax havens, nor do we engage in trans-border operations with these areas. Thus, we assess that we do not have risks of significant impacts in this area.
