

PPWR Packaging Requirements for Suppliers

As a supplier to Micropower delivering products and/or packaging, we ask you to review the PPWR requirements (Packaging and Packaging Waste Regulation Regulation (EU) 2025/40 applicable on 12 August 2026) applicable to your products and packaging and take the necessary actions to ensure compliance.

Suppliers are responsible for understanding and fulfilling the legal obligations applicable to their business and products under the PPWR. Micropower expects suppliers to take the necessary measures to ensure compliance within the applicable timelines.

We expect our suppliers to:

- Review and understand the PPWR requirements relevant to their products and business.
- Assess the compliance of packaging supplied to Micropower entities within the EU.
- Ensure that required packaging markings and information are provided where applicable.
- Maintain the technical documentation required to demonstrate compliance.
- Provide relevant technical documentation, declarations and supporting information to Micropower upon request.
- Prepare and maintain the **Declaration of Conformity (DoC)** where required by their role under the PPWR.
- Inform Micropower of any changes that may affect the compliance of products or packaging supplied to us.

We appreciate your cooperation
